

CONCRETE TECHNOLOGY – PROJECT SCOPE

1. Theme from.
2. Literature.
3. Test results of materials:
 - a. - aggregates:
 - i. sieve test,
 - ii. density,
4. Characteristic of mix design method).
5. Calculations (water demand coefficient, softening coefficient, tightness, recipe).
6. Description of concreting.
7. Concrete mix consistency test.
8. Compressive strength test results.
9. Determination of class strength of concrete.
